

KRIMA TRIVEDI

Aspiring Machine Learning Engineer
| AI Enthusiast | Full-Stack Developer

Profile

Full Stack Developer with 2+ years of experience in Python (Django), AngularJS, and SQL. Built and deployed scalable web applications and REST APIs. Now applying extensive data-handling and Python skills to transition into Machine Learning and AI, eager to develop data-driven, real-world solutions that directly impact business outcomes.

Work Experience

2023

-

Intellial Solutions Pvt. Ltd. – Ahmedabad

Full Stack Developer

- Designed and maintained backend modules for a PCB management platform using Python/Django and SQL, gaining a strong foundation in data workflows and system performance.
- Collaborated with cross-functional teams to build and optimize data APIs for enhancing overall system performance and user experience.
- Developed and maintained a multi-site customer portal using AngularJS, HTML, and CSS.

Projects

AI Meeting Summarizer

- Built: An NLP pipeline that ingests meeting transcripts and generates concise summaries with extracted action items and key points. Utilized spaCy, NLTK, and Transformers.
- Value: Delivered actionable meeting recaps, enabling faster decision-making for stakeholders.

Resume Screening System

- Built: A Streamlit application that extracts skills, education, and experience from resumes and compares them to a job description to calculate a match score. Used NER, regex, and a logistic regression model.
- Value: Automated and accelerated the recruiter screening process, automatically surfacing best-fit candidates.

Customer Churn Prediction

- Built: An end-to-end churn prediction solution on the Telco Customer Churn dataset, from data cleaning and feature engineering to model training (Logistic Regression, XGBoost) and evaluation (confusion matrix, ROC). Used SHAP for explainability to identify key churn drivers (e.g., contract, tenure).
- Value: Enabled data-driven retention strategies by identifying high-risk customer. Achieved 79-80% accuracy

Education

Bachelor of Engineering

L.J.I.E.T

2018

Technical Skills

Programming Languages:
Python (including data science libraries), SQL, JavaScript, HTML, CSS

Data Science & Machine Learning:

- ML Libraries: Scikit-learn, XGBoost, Pandas, NumPy
- Deep Learning & NLP: spaCy, NLTK, Transformers
- Data Visualization: Matplotlib, Seaborn
- ML Concepts: Data Cleaning & Preprocessing, Model Building & Evaluation, SHAP

Databases:

PostgreSQL, MySQL, SQLite

Tools & Platforms:

Git, GitHub, Jupyter Notebook, VS Code, Postman, Streamlit

Language

English

Gujrati

Hindi

Certifications

Google IT Automation with Python

Google
Coursera

Machine Learning

DeepLearning.AI, Stanford University
